PUPPYCHEF AI ORDER SYSTEM

Complete Client Presentation & Demo Guide

EXECUTIVE SUMMARY

What We Built for Puppychef

Problem: Harjeet Makhija (Puppychef) loses orders in WhatsApp chaos. Custom cake details get lost. No repeat customer tracking. Manual order management takes 2+ hours daily.

Solution: AI-powered WhatsApp Order Bot + Professional Landing Page

│  - Google Sheets integration (optional)                   │
│  - Order confirmation with ID                             │
└──────────────────────────────────────────────────────────┘
```

Tech Stack Used

Component	Technology	Why
Backend	Node.js + Express	Fast, reliable, scalable
AI Engine	NVIDIA NIM (Llama 3.3 70B)	Free tier, fast responses
WhatsApp	Meta Business API	Official, no ban risk
Landing Page	Next.js 14 + React	SEO-friendly, fast
Styling	Tailwind CSS + Claymorphism	Modern, playful design
Hosting	Vercel + Render	Free, auto-deploy
Icons	Lucide React	Professional SVG icons

Key Features Implemented

WhatsApp AI Bot "Priya"

- ✅ Natural conversation (Hinglish + English)
- ✅ Custom cake ordering (size, flavor, pet name, message)
- ✅ Menu browsing by category
- ✅ Order confirmation with total calculation
- ✅ Duplicate prevention (no spam)
- ✅ Rate limiting (1 reply per second)

Landing Page

- ✅ 14 menu items with real Unsplash images
- ✅ Category filter (Cakes, Treats, Food, Cafe)
- ✅ Shopping cart with add/remove
- ✅ WhatsApp integration (direct order)
- ✅ Mobile-responsive (iPhone optimized)
- ✅ Claymorphism design (modern 3D effect)
- ✅ 95 kB bundle (loads in 1-2 sec)

PART 2: CLIENT CALL SCRIPTS

Script 1: Initial WhatsApp Approach

Message 1: Introduction

```
Namaste Harjeet ji! 👋

Main Raghav Shah, RAGSPRO AI Agency se. Maine aapki Puppychef Instagram page dekha –
bahut impressive hai! 4.6⭑ rating aur 6+ years ka experience – truly Delhi's premium
pet bakery.

Main aapke liye ek AI WhatsApp Order Bot bana ke laaya hoon jo aapka order management
```

```
asaan kar dega.

Demo dekhna chahiye? 10 minutes mein samajh aa jayega.
```

Message 2: Value Proposition

```
Harjeet ji, jo problem mujhe samajh aayi:

❌ Orders WhatsApp + Instagram DMs mein scattered hain
❌ Custom cake details chat mein kho jaati hain
❌ Repeat customers ka record nahi
❌ Har order pe 30-40 minutes lagte hain

Mera solution:
✅ Customer sirf "Hi" likhe, bot automatically order lega
✅ Customization (size, flavor, pet name) sab capture hoga
✅ Order confirmation with total price instant
✅ Aapko sirf payment confirm karna hai

Time bachao, orders badhao. Demo chahiye?
```

Message 3: Demo Link

```
Harjeet ji, yeh raha demo:

🌐 Landing Page: https://puppychef-v2.vercel.app
📱 WhatsApp Test: https://wa.me/15551817070

Landing page pe try karo:
1. Menu dekho - sab 14 items with photos
2. "Add to Cart" karo
3. "Order on WhatsApp" click karo

Aapko automatically WhatsApp pe message jaayega poora order ke saath!

Feedback do jab free ho.
```

Script 2: Phone Call Script (10-15 minutes)

Opening (0-2 min)

```
"Hello Harjeet ji, Raghav bol raha hoon RAGSPRO se.

Aapke paas 2 minute hain? Main aapko ek AI system dikhana chahata hoon
jo aapka WhatsApp order management poora badal dega.

Aapne dekha hoga - roz kitne WhatsApp messages aate hain
'Cake chahiye', 'Price kya hai', 'Delivery kab hogi'
```

```
Aur custom cake ke liye toh 10-15 messages exchange hote hain -
right?

Mera system yeh sab automatic kar deta hai."
```

Problem Agitation (2-4 min)

```
"Mujhe samajh aaya ki aapke 3 bade problems hain:

1. ORDER SCATTERING - WhatsApp pe, Instagram DM pe,
   phone pe - sab jagah se orders aate hain.
   Kuch toh miss ho jaate hain shayad?

2. CUSTOM DETAILS LOST - 'Bhaiya mere Bruno ke birthday pe
   medium cake chahiye chicken flavor mein' -
   yeh sab details kahan note karte hain?

3. REPEAT CUSTOMERS - Jo customer mahine mein 3 baar order
   karta hai, uska naam yaad hai? Uska pet ka naam yaad hai?

Agar ek system ho jo automatically:
- Order capture kare
- Details save kare
- Repeat customer pehchane
- Confirmation bheje with total

Toh aapka time kitna bachega?"
```

Solution Demo (4-8 min)

```
"Main aapko live demo dikhaata hoon:

[Screen share karo landing page]

Yeh hai aapka naya landing page - https://puppychef-v2.vercel.app

Dekho:
- Mobile pe perfect fit
- 4 categories - Cakes, Treats, Food, Cafe
- Sab items with real photos
- Customer 'Add to Cart' karega
- WhatsApp pe direct order jaayega

[WhatsApp bot demo]

Ab dekho AI Bot 'Priya' kaise kaam karti hai:

Customer: 'Hi'
Priya: 'Namaste! Kya order karna hai?'

Customer: 'Birthday cake chahiye'
```

```
Priya: 'Dog Birthday Cake? Size: Small ₹800/Medium ₹1500/Large ₹2500'

Customer: 'Medium'
Priya: 'Flavor: Chicken/Mutton/Peanut Butter?'

Customer: 'Chicken'
Priya: 'Pet ka naam?'

[And so on...]

End mein: 'Order Summary: Medium Chicken Cake for Bruno - ₹1500. Confirm?'

Customer YES kehta hai → Order confirmed with ID!

Aapko sirf payment link bhejna hai."
```

Pricing Discussion (8-12 min)

```
"Harjeet ji, 3 packages hain:

STARTER - ₹15,000
- WhatsApp bot + Landing page
- Basic order collection
- Google Sheets integration

PROFESSIONAL - ₹25,000 [RECOMMENDED]
- Sab kuch Starter mein +
- Repeat customer recognition
- Order tracking system
- Payment links (Razorpay)
- Daily order summary

FULL SETUP - ₹40,000
- Sab kuch Professional mein +
- Custom domain website
- 3 months support
- Staff training

Aapke liye main Professional recommend karunga -
₹25,000 mein complete system with payment integration.

Ek baar socho - agar yeh system roz sirf 2-3 extra
orders dilwa de (jo ab miss ho jaate hain),
toh ₹25,000 1-2 hafte mein recover ho jaayega.

Decision kab tak le sakte hain?"
```

Closing (12-15 min)

```
"Harjeet ji, main aapke liye kya kar sakta hoon?
```

```
Option 1: Aaj hi ₹5,000 advance deke start karo,
baki delivery ke baad

Option 2: Poora ₹25,000 upfront, 10% discount = ₹22,500

Option 3: Demo aur dekhna chahate ho toh
kal same time call karte hain?

Aapki convenience kya hai?"
```

Script 3: Meeting In-Person (30 min)

Opening (0-5 min)

```
"Namaste Harjeet ji!

Bahut accha laga aapka cafe dekh ke - sach mein
Delhi ka best pet bakery hai. Main toh aapka
Instagram follower bhi hoon ab! 😊

Main Raghav, RAGSPRO AI Agency se.
Aaj main aapke liye laaya hoon ek AI system
jo aapka order management 10x fast bana dega.

Pehle 5 minute mein problem samajhte hain,
phir 15 minute demo, phir 10 minute discussion.

Chalein?"
```

Live Demo (5-20 min)

```
"[Laptop kholke dikhate hain]

Harjeet ji, yeh hai aapka naya digital system:

STEP 1: LANDING PAGE
[https://puppychef-v2.vercel.app open karo]

Dekho - yeh aapka menu hai:
- Dog Birthday Cake with prices
- Pupcakes, Treats, everything
- Customer add karega cart mein
- WhatsApp pe direct order jaayega

[Phone pe bhi dikhate hain]

Mobile pe perfect fit hai - customer kahi bhi
khade hoke order kar sakta hai.

STEP 2: WHATSAPP AI BOT
```

```
[WhatsApp web open karo]

Ab dekho - main customer ki taraf se message karta hoon:

Me: 'Hi'
Priya (Bot): 'Namaste! Kya order karna hai?'

Me: 'Cake chahiye'
Priya: 'Dog Birthday Cake? Small ₹800/Medium ₹1500/Large ₹2500'

Me: 'Medium'
Priya: 'Flavor: Chicken/Mutton/Peanut Butter?'

Me: 'Chicken'
Priya: 'Pet ka naam?'

Me: 'Bruno'
Priya: 'Kitne cake chahiye?'

Me: '1'
Priya: 'Address batao?'

Me: 'Safdarjung Enclave Block C'
Priya:
'📋 Order Summary:
• Dog Birthday Cake - Medium - Chicken
• For: Bruno
• Price: ₹1500
• Total: ₹1500

Confirm? Reply YES'

Me: 'YES'
Priya: '✅ Order Confirmed! Order ID: PC-240404-001'

[Admin dashboard dikhate hain]

Aur yeh dekhiye - aapke admin panel pe
order aa gaya with all details:
- Customer phone number
- Pet name: Bruno
- Order: Medium Chicken Cake
- Address: Safdarjung Enclave Block C
- Total: ₹1500

Aapko sirf payment link bhejna hai!"
```

Objection Handling

Objection 1: "Bahut mehnga hai"

```
"Samajh sakta hoon Harjeet ji.

Lekin ek calculation karte hain:

Current situation:
- Roz 2-3 orders WhatsApp pe miss hote hain (busy hone se)
- Har missed order = ₹800-1500 loss
- Monthly loss = ₹30,000-40,000

System ke baad:
- Koi order miss nahi hoga
- Repeat customers automatically track honge
- Average order value badhega (upselling se)

₹25,000 investment, 1 month mein recover ho jaayega.

Aur socho - agle 2-3 saal yeh system chalega
bina koi monthly fee ke.

Actually mehnga toh nahi hai, investment hai
jo jaldi return aa jaata hai."
```

Objection 2: "Tech samajh nahi aata"

```
"Bilkul tension mat lo Harjeet ji!

Yeh system aapko chalana nahi hai -
yeh automatically chalta hai.

Aapko sirf:
1. Phone pe notification aayega 'New Order'
2. Payment link bhejna hai customer ko
3. Order prepare karna hai

System khud:
- Customer se baat karega
- Details lega
- Order confirm karega
- Aapko summary bhejega

Main aapko 30 minute training dunga -
bas itna hi chahiye.

Aur koi problem aaye toh main 24/7 available hoon
WhatsApp pe."
```

Objection 3: "Pehle se WhatsApp pe orders aate hain"

```
"Exactly! Isliye yeh system perfect hai.

Customers already WhatsApp use karte hain -
unhe koi nayi app download nahi karni.
```

```
Bas ab:
- 'Hi' likhe → Automatic reply aata hai
- Order details → Bot samajh jaata hai
- Confirmation → Instant aata hai

Aur landing page se bhi order kar sakte hain
jo directly WhatsApp pe aata hai.

Aapka existing workflow same rahega,
bas automation add ho jaayega.

Try karte hain 1 week ka trial?"
```

PART 3: PRICING STRATEGY

Package Comparison

Feature	STARTER ₹15,000	PROFESSIONAL ₹25,000	FULL ₹40,000
WhatsApp AI Bot	✅	✅	✅
Landing Page	✅	✅	✅
Order Collection	✅	✅	✅
Google Sheets	✅	✅	✅
Repeat Customer	❌	✅	✅
Order Tracking	❌	✅	✅
Payment Links	❌	✅	✅
Custom Domain	❌	❌	✅
3 Month Support	❌	❌	✅
Staff Training	❌	❌	✅

Recommended Approach

Lead with PROFESSIONAL (₹25,000)

Why:

- Complete solution hai
- Payment integration zaroori hai
- Repeat customer tracking valuable hai
- Mid-tier pricing = sweet spot

Discount Strategy: "Harjeet ji, agar aaj decision lete hain toh 10% discount = ₹22,500 final price.

Ya phir ₹5,000 advance, baki delivery ke baad."

PART 4: IMPLEMENTATION TIMELINE

Week 1: Setup (After Payment)

- Day 1-2: WhatsApp Business API verification
- Day 3-4: AI Bot training with Puppychef menu
- Day 5-7: Testing & refinement

Week 2: Soft Launch

- Beta with 5-10 friendly customers
- Feedback collection
- Minor tweaks

Week 3: Full Launch

- All customers informed
- Staff training (30 min)
- Go live!

PART 5: SUCCESS METRICS

Expected Results (3 Months)

Metric	Before	After	Improvement
Orders/day	2-3	8-10	3x
Order processing time	30 min	5 min	6x faster
Missed orders	20%	0%	Eliminated
Repeat customers	Unknown	Tracked	New capability
Average order value	₹600	₹1,000	67% ↑
Monthly revenue	₹40,000	₹1,50,000	275% ↑

PART 6: COMPETITIVE ADVANTAGE

Why Puppychef Will Win

Current Competition

Competitor	Tech Level	Weakness
Doggy Dough	Basic website	No WhatsApp automation

Petville	App only	High friction
Paws & Play	Instagram only	No order system

Puppychef's Edge

✅ **Award-winning recipes** (Petfed certified) ✅ **6+ years trust** in Delhi ✅ **4.6★ Google rating** ✅ **AI Automation** (first in segment) ✅ **Personal touch** + **Technology**

Positioning: "Delhi's First AI-Powered Pet Bakery"

PART 7: NEXT STEPS

Immediate Actions

1. **Send Demo Links** (Today)
    - Landing page
    - WhatsApp test
2. **Schedule Follow-up** (Tomorrow)
    - Call or meeting
    - Answer questions
3. **Proposal** (Day 3)
    - Formal quotation
    - Contract
4. **Start** (Within 1 week)
    - Advance payment
    - Implementation begins

APPENDIX
